

U District Station Area Mobility Plan

Presentation to the U District Small Businesses
on February 12, 2018

Desired Outcome:

*A holistic,
multimodal
mobility plan
for the
U District*

Planning for Growth and Change

- Facing unprecedented commercial, academic and residential growth.
- Station opens in 2021 and will serve 24,000 daily riders.
- Metro will fundamentally restructure area bus service in 2021.
- Major capital investments planned that should be coordinated and help build toward common, long-range goals.

Current Conditions

Current Conditions

Most people walk or take transit to the U District and UW.

Pedestrian amenities and public open space are lacking.

Transit suffers from speed & reliability issues and cumbersome transfers.

Automobile traffic is concentrated on:

NE 45th Street

Roosevelt Way NE & 11th Avenue NE

15th Avenue NE

Many pedestrians and bicyclists do not feel safe near major arterials.

Mode Splits

University District

Walking is the most common form of travel to U District destinations.

Only **14%** drive alone.

University of Washington

76% of students and employees take transit, walk or ride bikes.

Safety

Pedestrian Collisions

Bike Collisions

Concentration of Reported Collisions:

- **Pedestrians**
 - NE 50th Street
 - NE 45th Street
- **Bikes**
 - Campus Parkway
 - Burke-Gilman Trail

Guiding Principles

Guiding Principles

Access, Safety, Livability

Safe, comfortable, reliable access to light rail & buses for all.

Prioritize walking, biking, and transit near the station.

Great network of movement through and throughout the U District for every mode.

Transform right-of-way into active, public open space in the heart of the U District.

Ensure bus routes have reliable access and convenient transfers.

Accommodate people of all abilities.

Maintain short-term car and truck access where most needed and at safe speeds.

Vision Alternatives

Primary Areas of Study

Considerations:

1. **NE 45th Street** - *efficient flow through for buses, cars, freight*
2. **NE 43rd Street** - *attractive for intense pedestrian traffic*
3. **Brooklyn Avenue NE** - *festival street or bus to rail connections*
4. **The Ave** - *pedestrian-priority, market "high street"*
5. **Transit** - *primary transit pathways and efficient transfers*
6. **Bike Network** - *safe bike connections to the station & over I-5*
7. **Pedestrians** - *address safety concerns*

Community Outreach Plan

Proposed Community Outreach Plan

1. Determine **Barriers**

Community stakeholders identify barriers to mobility within new zoning
Stakeholders establish metrics for evaluation of success

1. Identify **Opportunities**

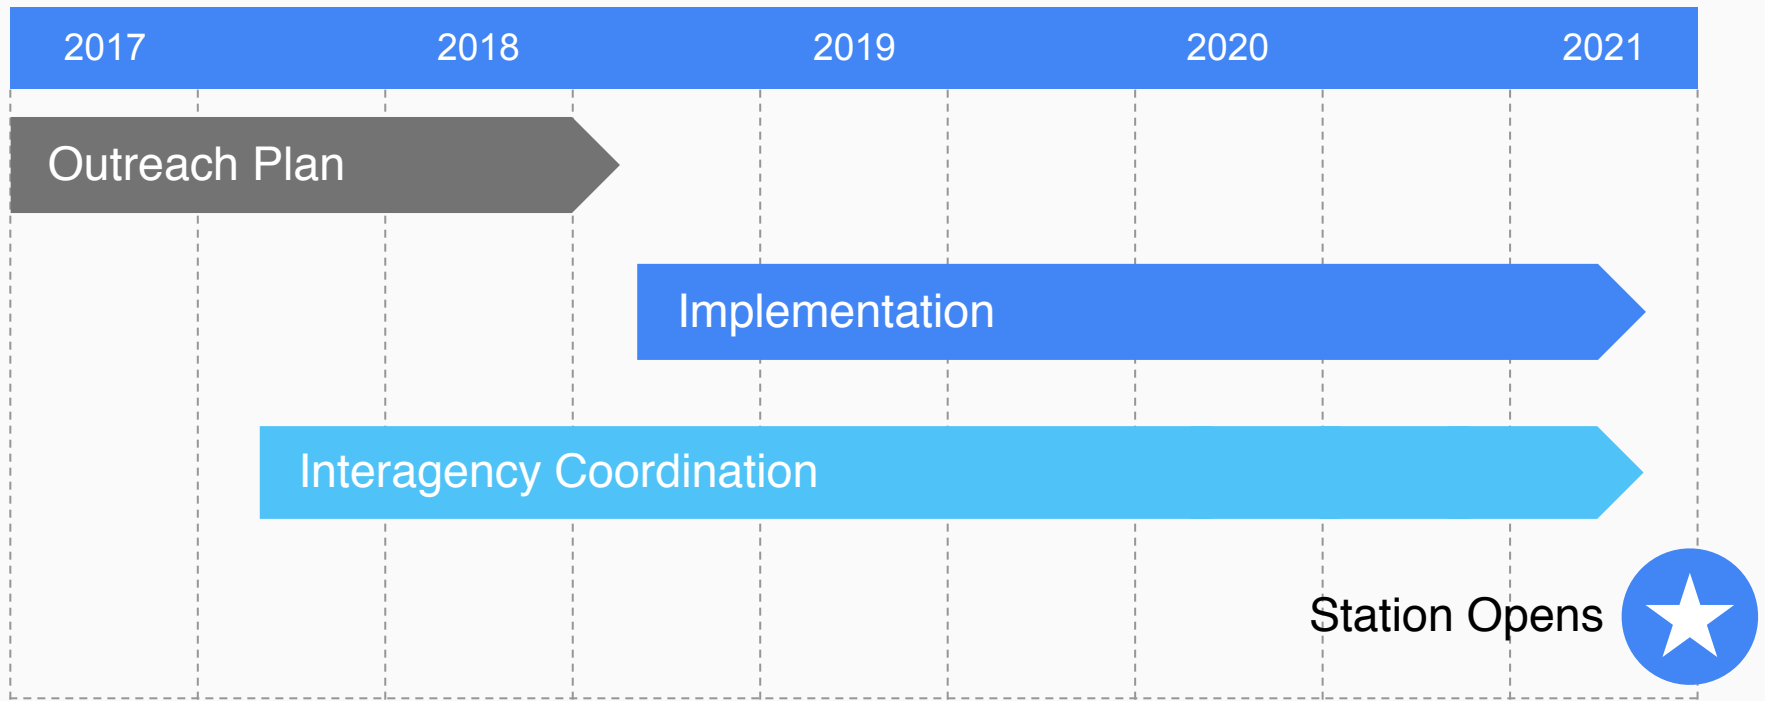

Community stakeholders weigh potential solutions to mobility issues
Stakeholders prioritize solutions and consider costs vs. benefits

1. Make **Decisions**

Shared session to process all community feedback and priorities into a plan
Stakeholders compromise on a phased implementation plan

How Do You Get Around?

THE PROJECT

U District Station Area Mobility Plan

The U District Station Area Mobility Plan (U-DAMP) is a community-driven project that addresses the needs of all those who walk, bike, ride the bus or drive. The project will engage the U District community in a public process to create a mobility plan that addresses the needs of all those who walk, bike, ride the bus or drive. The project will engage the U District community in a public process to create a mobility plan that addresses the needs of all those who walk, bike, ride the bus or drive.

- Our desired outcome is a public, multi-modal station area mobility plan for the U District.

A series of five community meetings are planned during the first part of 2018 to collect community feedback, identify barriers and opportunities, and to discuss potential solutions along with representatives from the City and local agencies. The product of the outreach process will be a vision plan released this summer to guide the transportation improvements around U District.

Your Feedback

Considerations:

1. **What are major barriers?**
2. **What fears or concerns do you have?**
3. **What are the questions you have about future transportation?**
4. **What else should we address in this mobility study?**

Thank you.
